Gallovac 9R®
Freeze dried live Salmonella gallinarum vaccine Strain 9R

Gallovac 9R is prepared from 9R strain for the control of pullorum-typhoid disease in chickens caused by Salmonella gallinarum / pullorum. It also aids in the partial control of Salmonella Enteritidis.

COMPOSITION:
Each dose contains a minimum of 2.0 x 10^7 CFU of freeze dried live attenuated Salmonella gallinarum vaccine prepared from the reference strain 9R.

INDICATIONS:
For active immunization of layers and breeders types of chickens as an aid in the control of Salmonella gallinarum (fowl typhoid) / pullorum and partial control of Salmonella Enteritidis infections.

DOSAGE AND ADMINISTRATION:
- Inject 0.2 ml subcutaneously into the lower part in the back of the neck.
- Add approximately 3 ml of the diluent to the freeze dried vaccine aseptically using a sterile syringe. Withdraw the dissolved vaccine into the syringe and add it to the rest of the diluent.
- Use the vaccine immediately within 2 hours after reconstitution.
- Primary vaccination: the ideal age for primary vaccination is 6-8 weeks of age.
- Secondary vaccination: at 14-16 weeks of age is recommended.

WITHDRAWAL PERIOD:
Zero days.

CONTRAINDICATION:
- Avoid using antibiotics or other antibacterial substances for 7 days before and 14 days after vaccination.
- Do not vaccinate sick or stressed birds.

SPECIAL PRECAUTIONS:
- Apply usual aseptic procedures.
- Use only clean, antiseptic or disinfectant-free materials for the preparation of the vaccine solution.
- Do not vaccinate sick or stressed birds.
- Exposure to infection should be avoided for 14 days following vaccination to allow immunity to be developed.
- Unused opened vaccine containers and waste material should be decontaminated with suitable disinfectants (phenolics, idophores or formaldehydes) at the recommended concentration.
- Care should be taken to avoid accidental injection.

STORAGE AND SHELF LIFE:
- Store between +2 °C to +8 °C, in the dark.
- The vaccine remains stable for 18 months from production date stated on the label under the recommended storage conditions.

PRESENTATION:
Vials of: 500 doses and 1000 doses.

FOR VETERINARY USE ONLY.
