Jova Zeit 1®
Inactivated oil emulsion Newcastle Disease Virus vaccine

COMPOSITION:
Each dose contains:
• A minimum of $10^{8.6}$ EID$_{50}$ of Newcastle Disease Virus strain La Sota before inactivation.
• Thiomersal and oil adjuvant.

INDICATIONS:
Monovalent inactivated oil emulsion vaccine to induce active immunity in chickens against Newcastle Disease Virus. The virus is grown in (SPF) chicken embryos, and then inactivated and suspended in aqueous phase mixed in oil adjuvant to produce a water-in-oil emulsion vaccine.

DOSAGE AND ADMINISTRATION:
• Bring the vaccine to room temperature.
• Shake the container well before use.
• Inject one dose per bird; 0.3 ml subcutaneously in the lower part in the back of the neck or intramuscularly in the breast or thigh muscle.
• Chickens:
  1st vaccination: 3 weeks of age or older.
  2nd vaccination: 16 to 18 weeks of age.
• Turkeys:
  1st vaccination: 3 weeks of age or older.
  2nd vaccination: 20 to 22 weeks of age.
• For optimal titer results, birds should be primed with live vaccine against Newcastle Disease Virus.

WITHDRAWAL PERIOD:
Zero days.

CONTRAINDICATIONS:
None.

SPECIAL PRECAUTIONS:
• Vaccinate only healthy birds.
• Apply usual aseptic procedures.

STORAGE AND SHELF LIFE:
• Store between +2 °C to +8 °C, in the dark.
• Do not freeze.
• The vaccine remains stable for 2 years from production date stated on the label under the recommended storage conditions.

PRESENTATION:
Bottles of: 300 ml (1000 doses).

FOR VETERINARY USE ONLY.
