

K&P Vac[®]

Lyophilisate suspension for injection live attenuated Kenyan Sheep and Goat Pox Virus (KSGP) strain 0240 & Peste des petits ruminants (PPR) Virus strain Nig. 75/1 vaccine

STATEMENT OF THE ACTIVE SUBSTANCE(S) AND OTHER INGREDIENTS:

- Active substance:
Each dose contains a minimum of 10^{2.5} TCID₅₀ of live attenuated Kenyan Sheep and Goat Pox Virus (KSGP) strain 0240 and a minimum of 10^{2.5} TCID₅₀ of live attenuated Peste des petits ruminants (PPR) Virus strain Nig. 75/1.
- Other ingredients:
Nonfat dried milk powder.

INDICATIONS:

K&P Vac vaccine is used for prevention of pox & PPR diseases in sheep and goat.

CONTRAINDICATIONS:

Do not vaccinate sick or stressed animals.

ADVERSE REACTIONS:

Very rare: small nodular reactions may occur at the sight of inoculation which disappear later.

If you notice any side effects please inform your veterinarian.

TARGET SPECIES:

Sheep and goats.

DOSAGE:

- Dosage is 1 ml per animal subcutaneously, (preferably in the elbow region), at 2-3 months of age.
- Re-vaccinate the animals annually.

ADVICE ON CORRECT

ADMINISTRATION:

- Apply usual aseptic procedures.
- Use only clean, antiseptic or disinfectant free materials for the preparation of the vaccine solution.
- Dissolve the freeze-dried pellet vaccine with cold and sterile diluent provided.
- Use 50 ml diluent for each 50 doses vaccine vial and 100 ml diluent for 100 doses vaccine vial.
- Use the vaccine immediately after reconstitution (within two hours in cool conditions).

WITHDRAWAL PERIOD:

Zero days.

SPECIAL STORAGE PRECAUTIONS:

- Store in a refrigerator (2°C-8°C).
- Protect from direct sunlight.
- Keep out of the reach and sight of children.

- The vaccine remains stable for 2 years from production date stated on the label under the recommended storage conditions.
- Shelf life after reconstitution: Use the vaccine within 2 hours after reconstitution.

SPECIAL WARNING(S):

Special warnings for each target species:

Vaccinate healthy animals only.

Special precautions for use in animals:

Not applicable.

Special precautions to be taken by the person administering the medicinal product to animals:

Although K&P Vac vaccine is not pathogenic for humans; care should be taken to avoid accidental injection.

Should accidental injection occur immediate medical care should be sought.

Use during pregnancy, lactation, lay, fertility:

Can be administered during pregnancy, lactation and breeding.

Interaction with other medicinal products and other forms of interaction:

No information is available on the safety and efficacy of this vaccine when used with any other veterinary medicinal product. A decision to use this vaccine before and after any other veterinary medicinal product therefore needs to be made on a case by case basis.

Overdose:

10X dose of a vaccine:

Rare: small nodular reactions may occur at the sight of inoculation which disappear later. If you notice any side effects please inform your veterinarian.

SPECIAL PRECAUTIONS FOR DISPOSAL:

Any unused veterinary medicinal product or waste materials derived from such veterinary medicinal product should be disposed of in accordance with local requirements.

OTHER INFORMATION:

Sheep pox and goat pox are viral diseases of sheep and goats. Both diseases are caused by strains of Capripoxvirus. Clinically, it is characterized by generalized pox lesions throughout the skin and mucous membranes, a persistent fever, lymphadenitis, and often a focal viral pneumonia with lesions distributed uniformly throughout the lungs. Subclinical cases may occur.

Peste des petits ruminants (PPR), is an acute contagious disease affecting small ruminants. It is usually characterized by severe pyrexia, ocular and nasal discharges, erosive lesions, which occur in the mouth, diarrhea and pneumonia.

Control measures are based on strict hygiene and vaccination of healthy susceptible animals.

Each dose of K&P Vac has the following characteristics:-

- Stable.
- Provides a satisfactory protection for at least one year against pox & PPR diseases in sheep and goat.
- Vaccination is followed by a good immune response.

Package sizes:

Vials of: 50 doses 100 doses.

FOR VETERINARY USE ONLY.
